## **DETAILED ACTION**

### ***Priority***

Acknowledgment is made of applicant's claim for foreign priority based on an application filed in China on October 20, 2000. It is noted, however, that applicant has not filed a certified copy of the Chinese application as required by 35 U.S.C. 119(b). APPLICANT HAS STATED THAT A COPY WAS ATTACHED TO THE LAST OFFICE ACTION, BUT NONE WAS FOUND IN THE IFW SYSTEM.

### ***Allowable Subject Matter***

Claims 1-24 and 45-52 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: Claims 1-24 and 45-52 are considered allowable for reasons of record set forth in the Office Action of September 8, 2004.

Claims 26-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The prior art does not teach the recited meridional profile or connecting zone depths that provide for a plurality of visible concentric rings.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 25 is rejected under 35 U.S.C. 102(b) as being anticipated by El Hage.

El Hage (in Fig. 5B) teaches a corneal refractive therapeutic contact lens for selectively altering the curvature of a patient's normal cornea, the contact lens having a central zone (10) having a posterior surface with a curvature and at least one peripheral zone (12) having a posterior surface provided adjacent and concentric to the connecting zone, said peripheral zone being integral with said connecting zone and being formed to be at least initially spaced from the cornea (col. 6, lines 8-13), where the lens is designed to impart desired forces to a normal cornea to alter the shape of the cornea by redistribution of corneal tissue. El Hage (in Fig. 5) does not specifically teach a connecting zone provided adjacent and concentric to the central zone, provided adjacent and concentric to the connecting zone where the peripheral zone being integral with said connecting zone. However, as shown in Fig. 5, the curve of the central zone (10) and peripheral zone (12) do not match and, therefore, must have a connecting zone. Therefore, it would have been obvious to one of ordinary skill in the art to provide El Hage with a connecting zone, since as described above this would be inherent in any structure having two dissimilar curves that connect.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
